Hello,

Please follow these steps if you are reporting a security vulnerability in one of our products:

1. Make sure it's not covered in our list of commonly reported non-vulnerabilities at <https://sites.google.com/site/bughunteruniversity/nonvuln>.  
2. If it's not, then please fill out the form at <https://www.google.com/appseve/search-bugs/new?key=ahzfmdvdyb2dsZ55b2o6cm9hY2gtatG9oFzWxyWAsDJlcc3BvbmlRiZENhY2hlikQ8Q0F0QUU1lMWYtTGIdDnTnQnbkJjX2J5cicG9uZDlWMT51JmV1ZDlTGfNFmd3pRl2HcjE2d2RRWdJRQG1haWwWz21haWwWz29iPgw> to provide us with some additional information needed to process and prioritize your report. You will be able to expedite urgent or high-severity reports. This e-mail address is not monitored by humans - if you do not fill out the form we will not be able to see your report.

Note that the above mentioned form is not the right place to solve security problems with your account, report non-security bugs, or suggest new product features. If you are not reporting a legitimate security vulnerability in one of our services, you won't receive a response and we'll be unable to take action on your message.

Solutions for the most common problems we are not able to handle via this channel are:

- For solutions to various problems with our products, suggesting product features, or reporting non-security bugs see Google Product Forums at <https://goo.gl/27WOL1>.
- For reviewing unexpected activity in your account, look at your account's "Recently used devices" page (<https://goo.gl/nbVbd>) and complete the Security Checkup (<https://goo.gl/BLMHMN>).
- For YouTube account hijackings, please see <https://www.google.com/support/youtube/bin/answer.py?answer=76187>.
- For Google (including Gmail) account hijacking, go to <https://www.google.com/support/accounts/bin/answer.py?answer=117219>.
