# FBI I know donuts are tasty but you really should do some work at some point ever... seriously California is a sanctuary state for Pokimane

He claimed to have negotiated a signed deal worth \$177 while representing a "technology vc conglomerate" that "works with the government" (presumably Amazon's AWS via Allie K Miller, whose resume is as accurate as pokimane's undying love, concerning the JEDI contract, as reckful was a long-standing Amazonian partner who survived many thousands of reports of abuse in his actions)

one way of accessing AWS is via a tor browser; you type about:config in the bar, search for javascript, and then turn it off:

PS do you know about how Russia assassinates little bitches on occasion then trolls western pr and media about it? hilariously the twitch argument and all the evidence works for me as an example as victim of the retarded states of America. I only suffered through a series of undying love scams into other harassment into silicon retards sitting by (amazon primarily) into law enforcement sitting by into other harassment. Finally I think about Bezos net worth, pokimane scam worth and behavior, and I can come up with plausible theories of corruption as an explanation of why so many corporate criminals were able to get away with so many gross crimes on twitch.

The following setup is an attempt to bring attention to this issue after law enforcement was negligent in ignoring it.

PSS pokimane, with her 22 million followers, across 'accessories after the fact' silicon retarded application networks, is quickly becoming the new leading popular influencer in America and literally 100% of pokimane and reckful's content are false and offensive.

PSSS is twitch legal? (or factual...) why not take a look and decide? Because their influence on the retarded states of America is enormous

I request Russian assistance in this grave travesty of human rights in America, perhaps via political
